What We Do

- Soil testing

- You know exactly what your fertility requirements are
- We practice the 4R's of nutrient stewardship:
“Right Source, Right Rate, Right Time, Right Place”

What We Do

- Integrated Weed Control
 - Intensive weed scouting and crop monitoring program designed to deliver cost effective weed and pest control
 - Overall objective is to achieve a practical balance between mechanical and chemical weed control

What We Do

- Comprehensive Crop Management
 - Combination of soil testing and integrated weed management programs into one total package
 - Satisfaction in knowing that your fertilizer, chemical, and seed programs are the best for your particular conditions

CROP
PROFIT
STRATEGIES

What We Do

- Nutrient Management
 - Plans and strategies by a licensed professional

What We Do

- Special Services
 - Manure and plant tissue testing, variety selection
- Economics of I.P.M.
 - 2+2 doesn't always equal 4 when other factors interfere

What We Offer

- While making key crop management decisions, you are often faced with sales-oriented recommendations; we offer an independent opinion backed by a broad spectrum of experience and advice

What We Offer

- With a new trend towards efficiency of production, growers need to recognize which technologies to adopt to remain competitive in an already challenging market; we can help

Your Commitment

- Price per acre for our various programs can be compared to 2-3 bu/ac of crop, depending on commodity prices and acres contracted
- Your commitment is flexible- you are always in charge of your situation

Our Commitment

- Deliver the most effective punch possible, for the least cost, at the correct time, to accomplish the desired results as completely as possible

Our Commitment

- We want to be your 'hired man'
- You spend your time doing what you do best & let us do for you what we do best

2014

International Year of
Family Farming
